PROFESSIONAL SUMMARY

I am a second-year B.Tech student specializing in Artificial Intelligence & Data Science at Stella Mary's College of Engineering, with a strong interest in game development using C# and Unity. My experience includes participating in hackathons, where I collaborate on real-world problems, sharpen my problem-solving skills, and contribute to innovative solutions. I'm also an active member of Toastmasters, where I enhance my communication and leadership abilities through structured practice and contests, which has boosted my confidence and clarity in conveying ideas.

Driven by a passion for entrepreneurship, I aim to make a positive impact through technology. I often take on personal projects that blend my technical skills with creativity, exploring areas such as app development and AI. Currently, I am seeking unpaid internships to gain practical experience and further develop my expertise in a professional setting.
